

DAC DATA SHEET

10G Direct Attach Cables

Champion ONE's 10G Direct Attach Cables (DACs) fill the need for short-range, cost-effective connectivity. In high-capacity server connections, DACs provide a power-efficient, easy-to-use replacement for optical transceivers and cables. These cables are fully compliant with EEPROM and memory map requirements to assure proper system identification and interoperability.

Champion ONE offers both straight SFP+ and breakout cables with 4x10G SFP+ modules at one end for breakout/aggregation applications.

Technical Specifications

STANDARDS AND REGULATORY COMPLIANCE

RoHS compliant
IEEE802.3ae
SFP+ MSA (SFF 8431)

PROTOCOLS AND DATA RATES

10G Ethernet
1G/2G/4G/8G/10G Fibre Channel
Infiniband QDR, DDR, SDR

DIMENSIONS

LxWxH (mm): 58.4 (122 incl. pull ring) x 13.5 x 8.5
0.5m to 10m Copper Cable (24 to 30 AWG)

CONNECTOR

Cables terminate with their respective form factors.

WARRANTY

All feature a limited lifetime warranty.

NOTES

See page 2 for programming compatibility capabilities.

1. These part numbers are for **Passport** universal cables, which can be used across multiple platforms and open systems. For programmed options, please refer to page 2.

Ordering Information: Programmed Cables

To order a cable programmed for use in a specific system, simply add “-C1” to the end of your network platform part number. For example, to order a 3m DAC programmed for 100% Cisco compatibility, your C1 part number will be **SFP-H10GB-CU3M-C1**.

The technical specifications listed on page 1 will be the same for all programmed options.

Ordering Information: Multi-Vendor Programmed Cables

For multi-vendor environments that require programming for one-to-one compatibility, please use the following scheme:
